

Learning Disability Commissioning Plan

2016/17- 2018/19

The West Lothian Strategic Commissioning Plans for Adults with a Learning Disability sets out our strategic ambitions, priorities and next steps required for delivering integrated health and social care support and services for people with a learning disability and autism, their families and carers in West Lothian for the next three years.

STRATEGIC COMMISSIONING PLAN – ADULTS WITH LEARNING DISABILITY

FOREWORD

The West Lothian Strategic Commissioning Plans for Adults with Learning Disability and Autism (the **LD Plan**) sets out our strategic ambitions, priorities and next steps required to deliver integrated health and social care support and services for people, their families and carers in West Lothian for the three year period to 2018/19.

The Keys to Life 2013 explains that people with learning disabilities have ‘a significant, lifelong condition that started before adulthood, which affected their development and which means they need help to understand information; learn skills and cope independently’.

The West Lothian Autism Strategy 2015 – 25 describes Autism Spectrum Disorder (ASD) as a lifelong developmental condition. People with Autism usually have problems with social interaction, communication and may require repetitive or restrictive routines. Some people with ASD also have learning disabilities and need specialist support but others do not. The focus of this strategy is on people who have learning disability and ASD.

The LD Plan has been developed within the context of national and local policy taking into account the key principles and values which underpin the planning, commissioning and provision of services and support for people with a disability, and has been informed through consultation with key partners, service users and carers.

The LD Plan should be read in conjunction with:-

- West Lothian Integration Joint Board Strategic Plan 2016-26 (**Strategic Plan**)
- West Lothian Learning Disability and Autism Needs Assessment (**LD Needs Assessment**)
- West Lothian Autism Strategy 2015-25

It is acknowledged that it is difficult to view services and commissioning for care groups as distinct or isolated from one another. Consequently the LD Plan acknowledges crossover with other health and social care groups:

- Adults with physical disability
- Mental health
- Older people
- Substance misuse

Ensuring our services are well positioned to meet the needs of residents in West Lothian is key to achieving the outcomes we have set, and I will be reviewing progress against this LD plan on an annual basis, refining where necessary, as the Integration Board matures in our local ownership of the resources we have to spend on health and social care services.

STRATEGIC COMMISSIONING PLAN – ADULTS WITH LEARNING DISABILITY

SECTION 1: OVERVIEW

Who we are

The Public Bodies (Joint Working) (Scotland) Act 2014 requires arrangements to be put in place for the delivery of integrated health and social care. Local and joint commissioning of health and social care services will be built around the needs of patients and service users and managed through the West Lothian Integration Joint Board (IJB) who will in turn direct West Lothian Council or NHS Lothian to deliver services on its behalf.

Vision, values, aims and outcomes

The vision of the IJB Strategic Plan 2016-26 for West Lothian (Strategic Plan) is “to increase wellbeing and reduce health inequalities across all communities in West Lothian”. The plan describes the values and aims and commits the IJB to the delivery of the nine national and wellbeing outcomes for health and social as required by the Scottish Government.

The strategic plan covers the geographical area of West Lothian and in accordance with the legislation defines two localities across which health and social care services will be planned and delivered, the East and the West. The localities will provide a key mechanism for strong local, clinical, professional and community leadership, ensuring that services are planned and led locally in a way that is engaged with the community and contributing to effective strategic commissioning.

The case for change

- It is recognised nationally and locally that whilst the health and care needs of individuals are closely intertwined, the services put in place to meet these needs can be disjointed and not as co-ordinated as they could be.
- Combining the resources of both agencies within the integrated partnership will allow for greater exploration of efficiencies to ensure we can meet the main health and wellbeing challenges at a time when we also need to reduce costs.
- West Lothian has a faster than average population growth, an aging population and growing numbers of people living longer with disabilities, long term conditions and complex needs, all of which require us to ensure we have commissioned our health and social care services to meet our duty of Best Value but also to ensure our resources are targeted to achieve the greatest impact on those most in need.
- There is a programme of modernisation and redesign of learning disability services being led by the Lothian Learning Disability Collaboration will see a shift in care from hospital settings to the community across the Lothian IJBs.

STRATEGIC COMMISSIONING PLAN – ADULTS WITH LEARNING DISABILITY

OUR APPROACH

The IJB has committed to developing strategic commissioning plans for all adult care groups. These plans aim, over time, to incorporate the important role of informal, community capacity building and asset based approaches with the delivery of more effective preventative and anticipatory interventions, in order to optimise wellbeing and reduce unnecessary demand at the 'front door' of the formal health and social care system. Each commissioning plan will confirm the total resources available across health and social care and relate this information to the needs of the care group as determined by a local needs assessment and other relevant local or national strategies.

As a first stage in the development of a commissioning plan for adults with learning disability, independent specialists in research and evaluation of the health and social care sector were commissioned to carry out a comprehensive local needs assessment. The needs assessment process involved:

- analysis of data based on the population, including demographic trends, health status and risk
- wide consultation with the public through surveys, focus groups, etc.
- consideration of the views of professionals or experts
- benchmarking with other areas in Scotland

Following consultation through the Learning Disability Commissioning Working Group and the Learning Disability Forum, the resultant commissioning plan for adults with learning disability will:

- reflect needs and plans as articulated at a local level for West Lothian
- confirm the desired outcomes and link investment to them
- detail what services will be delivered against outcomes and the associated performance indicators
- prioritise investment and disinvestment in line with assessed needs
- ensure that resource deployment and performance is consistent with the duty of best value
- ensure that sound clinical and care governance is delivered

SECTION 2: NEEDS ASSESSMENT RECOMMENDATIONS

The Needs Assessment made 17 recommendations. The recommendations have been mapped against the National Health and Wellbeing Outcomes (detailed in Appendix 1) and then referenced against other strategic plans in order to evaluate whether the recommendation will be delivered through other routes or included for delivery as part of our commissioning cycle in this LD plan.

SECTION 3: COMMISSIONING PRIORITY ACTIVITIES

This section details the specific recommendations which have been captured from the needs assessment and the strategic plan, and provides information on the current or planned spend to meet these priorities in relation to the integration outcomes. In addition to these recommendations, all other existing services and resources which are allocated to provide health and care for the learning disability and autism care groups will continue to be provided as is, and finally, the whole population universal health services which all residents of West Lothian have access to are provided to show the full picture of the resources available.

SECTION 4: NEXT STEPS

The LD Commissioning Plan is designed to run for 3 years from 2016 /17 to 2018/19, at a time of considerable change in the commissioning environment within health and within social care. Some of the priorities outlined in the plan have an end date beyond the life of the commissioning plan as they are linked to developments with a longer timescale. Decision on the investment and disinvestment of resources will require to be made as the actions outlined below are progressed.

A comprehensive action plan will support the development of services for people with learning disability and autism and will incorporate the priorities contained in this commissioning plan, recommendations outlined in the Keys to Life and developments arising from the Lothian Modernisation and Redesign Programme. Progress will be monitored via the West Lothian Learning Disability Joint Management Group.

The LD Commissioning Plan will be reviewed annually, and commissioning intentions developed each year in the form of an annual report which will summarise activity, progress and performance for the year.
