## Introduction

Welcome to the Scottish Fire and Rescue Service Ward Performance Report. This performance report is designed to provide citizens, stakeholders and partners with information relating to ward based activity undertaken by the Scottish Fire and Rescue Service.

In addition to historical ward based activity, this performance report provides information on the historic activity in the West Lothian Council area and Scotland. To allow benchmarking to be undertaken, the units of measurement in the performance graphs in the report are based on incidents/events per head of population.

Whilst using historic statistical benchmarking data, consideration must be taken of the somewhat random nature of fire related incidents and events, and how this can pose difficulties in interpreting emerging patterns and trends. This is of specific relevance where ward level data is analysed due to the relatively small number of actual incidents/events that occur in ward areas.

However, regardless of statistical anomalies, emerging patterns and trends in fire related incidents and events can assist the Scottish Fire and Rescue Service and Community Planning Partners plan and implement preventative intervention initiatives to target reducing fire related incidents and events.
