Modular Access Ramp System

Whiland Modular Ramp System

Manufactured in our production facility in Dumbarton, the **Whiland modular ramp system** is made from galvanised steel and is extremely strong - producing no bounce when used.

Tried and tested in the harsh climate of Norway, these ramps are ideally suited to cope with weather in the UK. Simple to install and built to last, they are guaranteed to provide many years of access and are fully relocatable and reusable.

Features:

- Adaptable to suit most locations
- Complies with relevant building regulations
- Easily installed in hours
- No special building work required
- Ramps can be fully relocated and reused
- Totally maintenance-free

Whiland is a long-established family run Scottish company with over 35 years experience of providing the highest quality of service tailored to suit each individual client. Based in Dumbarton, central Scotland, we are ideally situated to serve clients in Scotland and the north of England.

Whiland manufacture and install disabled access systems, Stairclimbers and Evac chairs for home or business use.

Whiland will also carry out planning applications and associated landscaping work for our modular ramp systems. Working with carefully chosen partners we can provide low threshold doors and other associated works

Specification:

- Manufactured from galvanised steel
- Long life span
- Maximum load of 350 Kg / m2
- Meets Building Regulations
- No permanent fixing to property
- Child-safe handrails as standard
- Black plastic coating to top of handrails
- Expanded metal or GRP surface
- Standard widths of 100cm, 120cm or 150cm
- Support pillars are height and level adjustable
- Steps and gates to compliment ramps

Whiland also supply a full range of portable ramps including the Roll a Ramp range of products and accessories. In addition we are agents for the AAT range of powered stairclimbers and offer full demonstration, training and servicing on all products.
